

— ENTERPRISE ARCHITECTURAL SPECIFICATION

All-in-One Real Estate **Operating Engine** & Feature Matrix

An exhaustive functional breakdown of every core subsystem, automated workflow, marketing automation tool, HR engine, document generator, and financial control built into NAW PropertyFlow CRM.

MODULE 01 Land & Inventory Allocation	MODULE 02 Milestone Installments & SOAs	MODULE 03 Realtor & Commission Hub
MODULE 04 Lead & Inspection Logistics	MODULE 05 Drip Nurture & Campaigns	MODULE 06 Legal Document Factory
MODULE 07 Diaspora Investor Portal	MODULE 08 Project Milestones & Storage	MODULE 09 Expenses, Cash Flow & Accounting
MODULE 10 HR, Leaves & Payroll Engine	MODULE 11 Department Targets & KPIs	MODULE 12 Multi-Branch & Role Security

CORE OPERATIONS

1. Smart Plot & Layout Allocation Engine

Centralized inventory control preventing double-allocations and managing land prototype layouts.

 Multi-Estate Plot, Unit & Prototype Registry

Why It Matters: Double-allocating a single plot in high-value areas like Guzape or Katampe destroys developer reputation and triggers severe legal liabilities. NAW PropertyFlow eliminates this risk completely.

Tracks every plot number, square meterage (e.g., 250sqm, 500sqm, 1,000sqm), prototype building type (Fully Detached Duplex, Terrace, Penthouse), layout coordinates, and live status (Available, Reserved, Under Inspection, Allocated, Sold).

- ✓ Instant Real-time Estate Occupancy Rate

✓ Phase & Sector layout categorization
- ✓ Plot Locking during inspection/booking

✓ Plot swapping & reassignment history

CASH FLOW SECURITY

2. Milestone Installment & Billing Engine

Automated payment plans, scheduled milestone reminders, and instant digital statements of account.

 Automated Nigerian Payment Schedules & SOA

Why It Matters: Un-tracked installment payments freeze project cash flow. Automated milestone alerts ensure 95%+ on-time debt collection without uncomfortable manual confrontations.

Configures flexible installment structures (Outright, 3-Month, 6-Month, 12-Month, 24-Month). Automatically computes principal paid, outstanding balances, overdue penalties, and issues instant Statements of Account (SOA).

- ✓ Automated SMS & Email due-date alerts

✓ Direct Bank Transfer reconciliation
- ✓ 1-Click PDF Payment Receipts & Invoices

✓ Comprehensive Client Ledger audit trail

REALTOR NETWORK

3. Realtor & Affiliate Commission Management

Zero-dispute commission tracking, multi-tier agency overrides, and automated payout vouchers.

Multi-Tier Commission Engine & Broker Ledgers

Why It Matters: Top-selling Abuja realtors leave developers who delay or miscalculate commissions. Automated calculation and instant voucher issuance makes you the preferred developer for high-performing agents.

Supports individual agents, brokerage groups, and multi-tier network hierarchies. Automatically splits commissions upon verified client deposits, calculates team leader overrides, and tracks pending vs approved payouts.

- ✓ Automated Commission Voucher Generation
- ✓ Tiered percentage rules per estate
- ✓ Split-deal commission allocation
- ✓ Realtor leaderboard & performance stats

SALES CONVERSION

4. Lead Pipeline & Site Inspection Logistics

Full-funnel lead tracking from initial WhatsApp inquiry to physical inspection and closing.

Inspection Logistics & Follow-Up Automation

Why It Matters: Over 60% of real estate sales drop off because site inspections are forgotten or poorly organized. This module automates inspection schedules, driver assignments, and post-visit follow-ups.

Captures leads across Meta Ads, WhatsApp, website forms, and walk-ins. Schedules physical site inspections with vehicle/driver assignment, sends automated SMS directions to prospects, and logs inspection outcome feedback.

- ✓ Visual Lead Stage Pipeline (Kanban)
- ✓ Inspection Booking & Vehicle Logistics
- ✓ WhatsApp 1-Click Messaging Hub
- ✓ Daily Follow-Up Task Queue for Sales Reps

AUTOMATED MARKETING

5. Drip Nurturing, Sequences & Broadcast Campaigns

Multi-channel drip sequences and automated marketing broadcasts that convert cold leads on autopilot.

 Automated Drip Sequences & Mass Broadcasts

Why It Matters: High-ticket real estate purchases take 30 to 90 days to close. Without automated drip sequences, sales reps forget to follow up, and prospective buyers buy from competitors.

Enroll leads automatically into step-by-step timed email & SMS drip sequences (e.g. Day 1: Welcome Brochure, Day 4: Inspection Video, Day 10: Infrastructure Progress Update, Day 21: Limited Promo Offer). Send mass promotional broadcasts to targeted buyer segments.

- | | |
|--|---|
| ✓ Multi-Step Drip Sequence Builder | ✓ Automated Trigger Enrollments by Lead Stage |
| ✓ Bulk SMS & Email Broadcast Campaigns | ✓ Campaign Engagement & Open Rate Tracking |

OPERATIONAL AUTOMATION

6. Automated Legal & Commercial Document Factory

Dynamic generation of branded, watermarked, legal agreements and official letters.

 Instant Real Estate Legal Document Automation

Why It Matters: Typing legal documents manually in Microsoft Word introduces clerical errors, takes hours per client, and slows down closing momentum. NAW PropertyFlow generates verified legal documents in 3 seconds.

Merges buyer information, plot coordinates, agreed price, and milestone schedules directly into pre-approved legal templates. Produces high-resolution PDF documents with company branding, official watermarks, and verification codes.

- | | |
|---------------------------------------|--|
| ✓ Provisional & Final Offer Letters | ✓ Contract of Sale & Deed of Assignment |
| ✓ Provisional Plot Allocation Letters | ✓ Template Versioning & Dynamic Placeholders |

GLOBAL REACH & TRUST

7. Diaspora Investor Self-Service Portal

Secure, transparent web portal for buyers in the UK, USA, Canada, and UAE.

 24/7 Overseas Client Experience & Trust Portal

Why It Matters: Diaspora buyers represent 40%+ of Abuja high-ticket land capital. Providing a dedicated dashboard where they can see their verified payments and site photos builds 100% trust and accelerates referrals.

Each client receives private credentials to view their properties, transaction histories, download official stamped receipts, review construction milestones, and communicate directly with their assigned relationship officer.

- | | |
|--|---|
| ✓ Real-time payment history & balance lookup | ✓ Construction progress photos & video logs |
| ✓ Direct download of all issued certificates | ✓ Client KYC update & documentation vault |

ENGINEERING & STORAGE

8. Project Milestones & Cloud Document Drive

Live civil engineering milestone tracking and integrated enterprise file storage.

 Site Development Milestones & Cloud Document Vault

Why It Matters: Developers need to track site delivery timelines (perimeter fencing, drainage, grading) while centralizing heavy architectural drawings, survey plans, and AGIS approvals in one secure location.

Track civil engineering phases with completion percentages, target vs actual completion dates, and progress logs. Built-in cloud drive organizes layout diagrams, survey plans, and video assets in folder hierarchies with role-based access.

- | | |
|--|---|
| ✓ Project Development Milestone % Progress | ✓ Integrated Folder & Cloud File Storage |
| ✓ Secure Storage for AGIS, C of O & Survey Plans | ✓ Target vs Actual Delivery Date Variance |

FINANCIAL MANAGEMENT

9. Expense Tracking & Financial Accounting Hub

Complete operational oversight: vendor payouts, site development costs, and project margins.

Real Estate Expense & Cash Flow Manager

Why It Matters: Real estate projects bleed cash through untracked site expenses, unmonitored vendor payments, and missing receipts. This module enforces accountability across every single Naira spent.

Log and categorize expenses per estate project (e.g., Fencing, Infrastructure, Road Grading, Survey, AGIS Title regularizations, Marketing). Provides real-time profit and loss metrics per development.

- ✓ Project-based expense categorization
- ✓ Net cash flow & liquidity projections
- ✓ Vendor payment records & receipts attachment
- ✓ Multi-currency (NGN, USD, GBP) record support

HUMAN RESOURCES

10. HR Suite, Leave Management & Payroll Engine

Automated monthly staff payroll, salary structures, leave management, and appraisals.

Comprehensive HR Management & Payroll Generation

Why It Matters: Real estate companies struggle with manual payroll calculations, untracked employee leaves, and scattered staff onboarding. This module automates full HR administration in one place.

Define custom salary structures (Basic, Housing, Transport, Allowances, Deductions). Generate monthly payslips with 1-click PDF export. Manage employee leave requests, new staff onboarding checklists, and performance appraisals.

- ✓ Automated Monthly Payslip Generator
- ✓ Staff Onboarding & Task Checklists
- ✓ Leave Request & Approval Workflows
- ✓ Performance Reviews & Disciplinary Records

PERFORMANCE MANAGEMENT

11. Department Targets & Daily Staff Submissions

Set monthly sales quotas, monitor department KPIs, and track daily staff metric submissions.

 Target Setting, Quotas & Metric Submissions

Why It Matters: Sales teams without daily accountability miss monthly revenue goals. This module gives Managing Directors visibility into daily sales calls, site visits, and quota progress across every department.

Set granular targets for Sales, Legal, Operations, and Marketing teams. Staff submit daily activity metrics against assigned targets. Automated department reports give leadership instant executive clarity.

- ✓ Monthly Sales Rep Revenue Quotas

✓ Department Target vs Actual Variance
- ✓ Daily Staff Activity Metric Submissions

✓ Automated Executive Department Reports

GOVERNANCE & SECURITY

12. Multi-Branch Operations & Role Security

Multi-location enterprise branching, granular permission matrices, and immutable audit logs.

 Multi-Branch Hierarchy & Role-Based Permissions

Why It Matters: Growing real estate firms operate multiple branches (e.g. Abuja Head Office, Lagos, Port Harcourt). This architecture separates branch data while maintaining unified executive governance.

Manage multiple physical branches under one umbrella. Enforce granular role-based permissions (Super Admin, MD, Branch Manager, Accountant, Sales Executive, Legal Officer, Front Desk, Realtor) with immutable action logs.

- ✓ Multi-Branch Data Separation & Roll-up

✓ Immutable Security & Action Audit Trail
- ✓ Granular Permission Matrix per User Role

✓ Global Keyboard Quick Search (Ctrl+K)

ARCHITECTURE STANDARDS

Enterprise System Specifications

A quick technical reference of system requirements, security protocols, and infrastructure.

Technical Parameter	Specification & Architecture Standard
Deployment Mode	Cloud-Hosted Multi-Tenant SaaS or Dedicated Private Tenant Instance
Data Encryption	256-bit SSL/TLS In-Transit & AES-256 Encrypted Database At-Rest
Document Engine	Dynamic PDF rendering with Vector Graphics, QR Verification & Watermarking
Marketing APIs	Automated SMS Gateway, WhatsApp Direct Integration & SMTP Drip Sequencer
HR & Finance Engine	Salary Structures, Leave Tracking, Expense Categories, and Payslip Generation
Backup & Redundancy	Automated Daily Database Snapshots with 99.9% Uptime SLA Guarantee
Data Portability	Full CSV/Excel/PDF export capabilities for all clients, properties, and financials
