

Enterprise CRM & Real Estate Sales Management System

Complete Technical Architecture & Daily Operating Manual for Staff and Management

SYSTEM ACCESS & DEPLOYMENT SPECIFICATION

This comprehensive manual provides the executive team, sales consultants, administrative staff, and accountants at **Buckcrest Havens Limited** with a complete operational walkthrough of their dedicated PropertyFlow CRM suite. The system automates the end-to-end real estate lifecycle from lead acquisition to verified deal close.

Live Portal URL:	https://bhl.nawpropertyflow.com.ng/login
Instance Type:	Dedicated Isolated Multi-Tenant Instance
Organization:	Buckcrest Havens Limited
Database Environment:	Dedicated Database (stufedoc_nawcrm_bhl)
Active Functional Suites:	Customer Relationship Management (CRM) & Payment Plans
System Role Scopes:	Super Admin, Company Admin, Sales Executive, Finance Officer
Publication Date:	September 2026
Document Status:	Official Operational Client Release

1. Executive Overview & System Architecture

Buckcrest Havens Limited operates on a **cloud-native, multi-tenant real estate operating platform**. Unlike generic spreadsheet tracking or shared public tools, the Buckcrest Havens instance operates with complete data isolation, meaning your client phone numbers, lead notes, financial payment milestones, and proprietary sales figures are stored in a dedicated, independent database completely separated from other entities.

Key Security Highlight: All prospect records, bank deposit receipts, and transaction history created under the **bhl.nawpropertyflow.com.ng** domain write directly to your dedicated MySQL database. No external organization or demo user has access or visibility into Buckcrest Havens' commercial records.

Core Architectural Pillars:

- **Subdomain-Driven Routing:** When your staff access **bhl.nawpropertyflow.com.ng**, the system automatically initializes your corporate identity, branding, and permissions.
- **Zero-Leak Data Security:** Tenant identification middleware enforces strict barriers at the database connection layer, guaranteeing complete privacy for Buckcrest's customer base.
- **High-Speed Web Architecture:** Built with responsive mobile-ready Blade interfaces and asynchronous status updates, allowing sales reps to update leads from smartphones directly in the field.

2. User Roles & Permission Hierarchy

To ensure internal transparency while preventing unauthorized access to sensitive financial metrics, the system implements granular Role-Based Access Control (RBAC). Staff members only see the data and controls appropriate to their duty:

Role	Permitted Scope & Responsibilities	Dashboard View
Company Admin / Super Admin	Full control over the entire Buckcrest environment. Can register staff accounts, view company-wide sales figures, reassign leads, approve payments, and manage property developments.	Global Company Overview (All Leads, All Inflows)
Sales Executive / Agent	Focuses on pipeline conversion. Can capture new leads, schedule follow-ups, book physical site inspections, log client interaction notes, and submit deal reservations.	Personal Portfolio Only (Assigned Prospects)
Finance & Operations	Verifies customer proof of payment (POP), creates and monitors installment payment plans, approves payment milestones, and generates official sales allocation receipts.	Inflow / Milestone Verification Queue

3. Lead Capture & Visual Sales Pipeline (Kanban)

The core of Buckcrest Havens' revenue engine is the **Lead Management Lifecycle**. Prospects enter the system through various marketing channels and progress through clearly defined stages toward a closed sale.

Pipeline Stage	Operational Meaning	Next Action Required
New	Newly captured prospect from online adverts, walk-ins, social media, or referrals. No outreach conducted yet.	Initial introductory phone call or WhatsApp message within 15 minutes.
Contacted	Sales executive has successfully engaged the client. Budget, property preference, and investment timeline are being confirmed.	Send digital property brochure and request site visit availability.
Inspection Scheduled	Client has confirmed a physical or virtual site visit date to inspect one of Buckcrest Havens' estates or developments.	Conduct site tour, register inspection attendance, and log client feedback.
Negotiation / Proposal	Prospect has selected a specific plot or housing unit. Price negotiation, customized payment plans, or contract terms are underway.	Generate draft offer letter or payment milestone schedule.
Closed Won	Client has made an initial deposit or outright payment. Transaction is finalized and unit is allocated.	Finance verifies payment proof; official deed/receipt issued.
Closed Lost	Prospect did not proceed due to budget mismatch, location preference, or competitor choice.	Re-enroll in automated drip marketing campaign for future estate launches.

Drag-and-Drop Pipeline (Kanban Board)

Sales reps and team leaders can switch seamlessly between the classic tabular list view and the **Interactive Kanban Board**. Moving a lead from 'Contacted' to 'Inspection Scheduled' is as simple as dragging the card across the board. All changes instantly sync to the database and recalculate live stage conversion metrics.

4. Site Inspection Management Workflow

In Nigerian real estate, physical site inspections are the critical turning point between an interested prospect and a committed buyer. The Buckcrest CRM contains dedicated modules to ensure no inspection falls through the cracks:

- Booking an Inspection:** Sales reps click 'Book Inspection' directly from the client's profile, specifying the destination estate, meeting date, time, and assigned field officer.
- Inspection Statuses:** Each inspection transitions through Scheduled → Completed → Client No-Show → Cancelled.
- Post-Inspection Debrief:** Immediately following the visit, the consultant logs client reactions (e.g. 'Loved corner piece plot', 'Prefers 6-month installment plan'), providing team leads full visibility.

5. Payment Plans, Milestones & Financial Accounting

To cater to diverse buyer profiles, Buckcrest Havens Limited provides flexible payment options. The system replaces manual tracking spreadsheets with an automated **Payment Milestone Engine**:

A. Flexible Plan Generation

When recording a sale on a property, the consultant or accountant can choose between: **Outright Payment (100% upfront)** or **Custom Installment Schedule (e.g., 30% initial deposit followed by 3, 6, or 12 monthly milestones)**. The system automatically calculates due dates, remaining balances, and payment deadlines.

B. Proof of Payment (POP) Verification Queue

When a buyer makes a bank transfer to Buckcrest Havens' corporate bank account:

1. The sales representative uploads the bank deposit slip / transfer screenshot under the relevant milestone.
2. The milestone transitions to Pending Verification.
3. The Finance Department inspects company bank accounts, verifies the credit, and clicks '**Approve & Issue Receipt**'.
4. The system locks the milestone as Verified, credits the sales agent's commission tally, and updates the property balance.

FINANCIAL RECONCILIATION FLOW AT BUCKCREST HAVENS

Step 1: Deal Closed → **Step 2:** Installment Schedule Created → **Step 3:** Buyer Transfers Funds → **Step 4:** POP Attached → **Step 5:** Finance Approves → **Step 6:** Unit Allocation Finalized

6. Daily Leads Ingestion & Bulk CSV Import

For marketing campaigns, exhibition events, or outsourced lead generation drives, staff can ingest hundreds of prospects in seconds using the **Daily Leads Ingestion Modal**.

Key Ingestion Features:

- **Standard Template Download:** Staff can download the pre-formatted CSV template directly from the portal with one click.
- **Duplicate Protection:** An intelligent deduping filter automatically skips phone numbers already existing in the Buckcrest database, protecting consultants from stepping on each other's prospects.
- **Flexible Lead Allocation:** Leads can be assigned immediately to a specific officer, distributed evenly across team members, or credited to the importing consultant.
- **Outreach Tagging:** Tag bulk imports with specific marketing spots (e.g. 'Abuja Trade Fair 2026', 'Instagram Campaign Q3') for ROI tracking.

7. Executive Reporting & Performance Analytics

Buckcrest Havens leadership gains complete visibility into commercial velocity without waiting for manual weekly PowerPoint reports. The CRM calculates real-time key performance indicators (KPIs):

Executive Metric	How It Is Calculated	Strategic Importance
Total Active Pipeline	Count of all active leads currently in New, Contacted, or Inspection stages.	Measures near-term revenue potential and sales rep workload.
Conversion Rate (%)	$(\text{Total Closed Won Deals} \div \text{Total Captured Leads}) \times 100$	Identifies lead quality across advertising channels and sales team closing efficiency.
Monthly Cash Inflow	Sum of all verified milestone payments credited within the current calendar month.	Direct visibility into commercial estate cash collections.
Inspection-to-Close Ratio	Percentage of completed site visits that converted into a paid reservation.	Measures the effectiveness of physical site tours and closing pitches.
Consultant Leaderboard	Ranking of sales officers by volume of Closed Won contracts and revenue generated.	Automates commission tracking, performance bonuses, and quarterly appraisals.

8. Daily Operating Checklist for Buckcrest Staff

To achieve maximum return on investment from your CRM deployment, staff should adhere to this standardized daily routine:

Morning Routine (8:30 AM - 9:30 AM):

1. Log in to <https://bhl.nawpropertyflow.com.ng/login>.
2. Review 'Pending Follow-Ups' due for the day on your dashboard.
3. Check for any overnight marketing leads assigned to your profile in the 'New' stage.

Mid-Day Operations (10:00 AM - 3:00 PM):

4. Conduct prospect calls and immediately log summaries under 'Introductory / Activity Notes'.
5. Confirm upcoming site inspections scheduled for the weekend.
6. Upload proof of payment receipts for any bank deposits received.

Evening Close-Out (4:30 PM - 5:00 PM):

7. Drag successfully progressed leads into their next respective Kanban columns.
8. Set scheduled follow-up dates for all leads contacted during the day (never leave a lead without a scheduled next step).

9. System Specifications & Security Guarantees

Buckcrest Havens Limited benefits from enterprise-grade cloud security, reliability, and maintenance standards:

System Dimension	Implementation Specification
Application Domain	https://bhl.nawpropertyflow.com.ng
Database Engine	MySQL InnoDB with Emulated Prepared Statements & Strict ACID Compliance
Tenancy Model	Database-per-tenant isolation (Independent schema stufedoc_nawcrm_bhl)
Encryption & Auth	Bcrypt password hashing, CSRF session protection, HTTPS TLS 1.3 encryption
Audit Logging	Full activity tracking on lead assignments, status shifts, and payment approvals
Automated Backups	Daily scheduled MySQL database snapshots and file backups
Browser Compatibility	Fully certified on Google Chrome, Apple Safari, Microsoft Edge, Mozilla Firefox, and Mobile Web (iOS & Android)

10. System Administrator Sign-Off & Contacts

This system manual constitutes the certified operational guide for **Buckcrest Havens Limited**. For additional user creation, custom property additions, or staff training inquiries, please contact your designated CRM engineering team.
