DIAGNOSTIC COMPARISON

The Challenge: Scaling Beyond Spreadsheets

With rapid sales across 6 estate developments, the manual spreadsheet model reached a breaking point.

The Manual Spreadsheet Reality

- Plot availability spread across 15 Excel workbooks.
- Multiple accidental reservations on the same 500sqm plots.
- Accounts team took 2 days to compile a single customer SOA.
- Diaspora buyers in London constantly called for payment updates.

The NAW PropertyFlow Operating Model

- Single central inventory registry with automated plot locking.
- Zero double-allocation incidents across all 6 estates.
- 1-click instant PDF Statements of Account with verified payment logs.
- Diaspora buyers access 24/7 self-service portal with live drone updates.

Executive Managing Director Verdict:

"We were terrified of moving our historical records from Excel because of our active payment plans. NAW PropertyFlow migrated all 4,200 plots and client ledgers in 48 hours. Our installment follow-up time was cut in half, and our diaspora buyers now have complete confidence."

METHODOLOGY BLUEPRINT

The 4-Step Zero-Downtime Data Migration Protocol

How our technical solutions team guarantees zero data loss and flawless ledger continuity.

Step 01 **Extraction & Inventory Layout Ingestion**

We extract raw Excel plot registers, plot dimensions (250sqm/500sqm/1,000sqm), estate sectors, and prototype classifications.

Step 02 **Ledger Reconciliation & Milestone Schedule Mapping**

Historical payment records and outstanding installment balances are reconciled against bank statements and mapped into automated milestone schedules.

Step 03 **Dual-Verification & Executive Sign-Off**

Client accounts team verifies imported customer balances and plot occupancy metrics side-by-side with original Excel files before production go-live.

Step 04 **Role Activation & Diaspora Credentials Dispatch**

Staff roles activated with custom permissions; secure self-service portal credentials dispatched to diaspora buyers via SMS and email.

Migration Guarantee:

Every NAW PropertyFlow deployment includes 100% complimentary technical data migration performed by our senior database architects.

QUANTIFIED IMPACT

Measurable 90-Day Business Outcomes

Key operational metrics achieved following deployment of the NAW PropertyFlow operating backbone.
